Multilux

Multilux is the luxurious thermostatic valve solution for the two-point connection. In an ideal way Heimeier takes into account the position regarding the 50 mm connection found increasingly with bathroom and universal radiators. For the Multilux, that is available in one and two-pipe designs and each in angle and way types, is suitable for all Heimeier thermostatic heads and actuators.

The stainless steel spindle is provided with double O-ring sealing, the whole thermostatic insert can be changed under pressure.

Draining-off and filling is especially easy and unproblematic with the Multilux. The body is made of corrosion resistant gunmetal (nickel plated surface finish) – and the Multilux connection is of excellent design that can be provided with well shaped panelling.

50 mm centre to centre distance of the connections for radiators with Pp 1/2 inside thread or G 3/4 outside thread

Shut off and separate control cone for reproducible presetting.

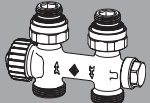

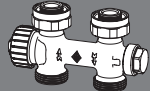

Easy to fill and drain-off

HEIMEIER connection M 30 x 1.5 for all HEIMEIER thermostatic heads and EMO actuators.

Stainless steel spindle with double O-ring sealing.

Insert can be changed under pressure.

Connection G 3/4 outside thread for compression fittings, suitable for all common types of pipe.

				
	Angle type Connection R 1/2	Angle type Connection G 3/4	Way type Connection R 1/2	Way type Connection G 3/4
Two-pipe system	3851-02.000	3853-02.000	3850-02.000	3852-02.000
One-pipe system	3855-02.000	3857-02.000	3854-02.000	3856-02.000

Supplied without compression fittings. Accessories and further information see brochure Multilux.
